

Toyota Forklift

Toyota Forklift Training Barrie - In the U.S., Toyota Materials Handling inc., or TMHU, continues to be the top selling lift truck dealer since 1992. Proudly celebrating more than 40 years of operations, the Irvine, California situated business offers a comprehensive line of quality lift trucks. Owing to their reputation of superiority, reliability, and durability, Toyota remains popular in this competitive market. Quality is the foundation of Toyota's legendary Toyota Production System practiced at all manufacturing facilities, including TIEM, which is stands for Toyota Industrial Equipment Manufacturing, situated in Columbus, Indiana. The bulk of the Toyota lift trucks sold in the U.S. are built here.

All Toyota machines and components designed within North America adhere to the International Organization for Standardization or ISO 14001 standard. The Columbus TIEM plant has been honored on many occasions for its dedication to continuous progress and its environmentally friendly systems. It is the first and only maker to offer EPA and CARB-certified Compressed Natural Gas powered lift trucks on the market. For example, the Toyota 8-Series IC lift vehicles emit 70% less smog forming emissions than the existing federal EPA standards and have complied with California's strict emission standards and regulations.

TMHU, U.S.A.- Leading the Industry

Brett Wood, President of TMHU, links Toyota's achievement to its robust dedication to fabricating the best quality lift trucks at the same time as delivering the utmost client service and support. "We must be able to learn and predict the needs of our customers," said Brett Wood. "As a leader, our success also depends on our ability to address our customers' operational, safety and environmental cost issues." TMHU's parent company, Toyota Industries Corporation, often known as TICO, is listed in Fortune Magazine as the world's largest lift truck provider and is among the magazines celebrated World's Most Admired Companies.

New Meaning to Environmental Accountability

Toyota's parent company, Toyota Industries Corporation, has imparted an outstanding company values towards environmental management within Toyota. Toyota's rich history of environmental protection whilst retaining economic viability can not be matched by other corporations and certainly no other resource handling maker can yet rival Toyota. Environmental responsibility is a fundamental feature of company decision making at Toyota and they are proud to be the first and only manufacturer to offer UL-listed, EPA- and CARB-certified Compressed Natural Gas powered lift vehicles. Yet an added reason they remain a leader within the industry.

In 2006, Toyota introduced the 8-Series line. The 8-Series signifies both Toyota's innovation and leadership in the industry. It features an exclusive emission system that surpasses Federal EPA emission standards, and also meets California's more involved 2010 emission standards. The end invention is a lift vehicle that creates 70% less smog forming emissions than the existing Federal standards tolerate.

Also in 2006, Toyota established an affiliation with the Arbor Day Foundation, furthering their responsibility to the environment. Upwards of 57,000 trees have been planted in regional parks and national forests damaged by natural reasons such as fires, as a product of this relationship. 10,500 seedlings have also been distributed through Toyota Industrial Equipment's network of dealers to non-profit organizations and local customers to help sustain communities all over the United States

Industry-Leading Safety

Toyota's lift vehicles offer improved output, visibility, ergonomics and durability, and most significantly, the industry's leading safety technology. The company's System of Active Stability, also called "SAS", helps lessen the possibility of incidents and accidental injuries, and increasing productivity levels while minimizing the potential for product and equipment damage.

System Active Stability can perceive situations that could lead to lateral instability and possible lateral overturn. When any of these conditions have been sensed, the SAS will immediately engage the Swing Lock Cylinder to re-stabilize the rear axle. This changes the lift truck's stability footprint from triangular in shape to rectangular, offering a major increase in stability which substantially reduces the probability of a mishap from a lateral overturn. The Active Mast Function Controller or the Active Control Rear Stabilizer also aids to avoid injuries or accidents while adding stability.

SAS was first released to the market on the 7-Series internal combustion models in 1999 and subsequently catapulted Toyota into the industry leader for safety. Ever since then, SAS has been built-in to most of Toyota's internal combustion machines. It is standard equipment on the latest 8-Series. There are more than 100,000 SAS-equipped lift vehicles in action, exceeding 450 million hours combined. The increased population of SAS-equipped vehicles in the field, along with compulsory worker instruction, overturn fatalities across all designs have decreased by 13.6% since 1999. Furthermore, there have been an overall 35.5% reduction in industry wide collisions, loss of control, falls and overturn from a lift vehicle for the same period.

Toyota's standard of excellence reaches far beyond its technological achievements. The company maintains an extensive Operator Safety Training curriculum to help purchasers meet OSHA standard 1910.178. Instruction courses, video lessons and an assortment of resources, covering a wide scope of subjects—from personal safety, to OSHA policies, to surface and load conditions, are offered through the seller network.

Toyota's U.S. Dedication

Toyota has sustained a permanent existence in the United States ever since its first sale. In 2009, Toyota Industrial Equipment Manufacturing, created its 350,000th lift vehicle. This reality is demonstrated by the statistic that 99% of Toyota lift trucks bought in

America at the moment are manufactured in the United States.

Based in Columbus, Ind., the Toyota Industrial Equipment Mfg. campus equals 998,000 square feet of facilities spanning 126 acres. Facilities include a National Customer Center, as well as production operations and distribution centers for equipment and service components, with the total investment exceeding \$113 million dollars.

The new National Customer Center was conceived to serve both dealers and buyers of TMHU. The facility includes a 360-degree showroom, a presentation theater complete with stadium seating for 32, an section for live product demonstrations with seating capacity for 120; a presentation theater; Toyota's Hall of Fame showcasing Toyota's story since the birth of its creator, Sakichi Toyoda, in 1867, and lastly a education center.

First in Client Satisfaction and Service

The NCC embodies Toyota's commitment to providing top-notch client service. TMHU's 68 sanctioned Toyota Industrial Equipment, or TIE dealers, along with 189 dealership locations all over the U.S, supply the most comprehensive and inclusive client service and support in the industry. The company's new and Licensed Used lift vehicles, service, components, and financing features make Toyota dealerships a one-stop shop to ensure total client satisfaction.
