

Boom Lift Training Barrie

Boom Lift Training Barrie - Aerial platforms or elevated work platforms are devices which enable workers to perform duties and tasks at elevated heights that would not be otherwise accessible. There are various aerial lifts on the market to carry out different applications under different site conditions. If operated carelessly, elevated work platforms could result in death or serious injury. The most common causes of related accidents are electrocution, falls, crushed body parts and tip-overs. Lift operators must be completely trained in techniques to prevent accidents while operating lifts.

Aerial Lift Safety course is intended for those who need to operate the devices more safely and effectively. The course provides thorough instruction about the most used lifting devices in the industry.. Kinds of lift covered consist of scissor, articulating and boom supported aerial lifts. The video presents the right methods operators must follow. Instruction focuses on protection against falls, pre-operational inspection, stability of the device and safe driving procedures.

The course addresses employee safety and equipment reliability. All instructional materials are compliant with state, government and provincial agency regulations and requirements. Training methods and course management will be taught. The trainer would likewise know the technical aspects of aerial lift safety.

Both classroom training and practical training are parts of the Aerial Platform/Boom Truck Training course. Both sessions should be completed successfully for the participant to receive a certificate of achievement.

The difference between self-propelled elevating work platforms and self-propelled boom-supported elevating work platforms is that, on the latter type, work platforms can be positioned totally beyond the base of the machine. The theoretical training component is almost the same for both types. The practical component of the training could be finished more quickly if just one type of machinery is utilized.

Elevating Work Platform Training Program Objectives:

Aerial Platform/Boom Lift Training provides competency requirements for safe operation of Boom-Type Elevating Work Platforms and Self-Propelled Elevating Work Platforms (for use on paved/slab surfaces). Training will help operators to make more efficient use of elevating work platforms while decreasing the possibilities of an expensive workplace accident. Trainees will review of business policies and applicable rules, talk about Due Diligence, review Criminal Negligence and consequences to employers, trainers, workers and supervisors. Participants will review machine features, operating procedures, stability, fueling/charging procedures and parking. Site-specific safety concerns will be dealt with.
