

Bucket Truck Training Barrie

Bucket Truck Training Barrie - The Vehicle-Mounted Aerial Work Platform or also called bucket truck training program is intended to decrease the chance of personal injury and incident when working in close proximity or with bucket trucks by effectively training qualified operators. An aerial lift device refers to any vehicle-mounted device, articulating or telescoping, or both, that is made use of to position employees to reach locations which will otherwise be unreachable. Aerial lift devices are utilized to elevate personnel to above-ground work sites.

The goal of the program is to provide operators with the skills, knowledge, training materials and abilities needed to learn to operate vehicle-mounted aerial work platforms effectively and safely.

The program consists of a classroom training session and a hands-on training session. To be able to become certified, participants must be successful in both parts. A full-size certificate and a wallet-size certificate would be given upon finishing the program.

The kinds of lifts examined in the program consist of Aerial lift devices are normally made of metal, wood, reinforced plastic, fiberglass or other materials.

Definitions

Articulating boom platform: has at least 2 hinged boom components.

Extensible boom platform: has a telescopic or extensible boom.

Platform: part of the aerial device that is designed to carry workers.
