

Boom Lift License Barrie

Boom Lift License Barrie - Only fully licensed persons must operate an aerial boom lift. Qualification could be attained through a combination of classroom sessions and practical training with the specific type of aerial lift which will be utilized on the job. A License is needed for any individual who works on or operates an aerial boom lift.

Vehicle-mounted aerial devices consist of the following work vehicles: extensible boom platforms, aerial ladders, articulating boom platforms, vertical towers, and whichever combination of these types.

When making use of a boom lift, there are a few basic safety regulations that apply to all boom lifts. Safety of the worker is a top priority whilst they are working inside the basket. The worker should always wear a body harness and lanyard, connecting it to the boom or basket. Never tie off to an equipment, an adjacent pole or a structure. Staff should stand on the floor of the basket, and never sit or climb on the edge of the basket. The manufacturer's load limitations must be adhered to.

Lift operators must be authorized to operate an aerial lift. The manufacturer's manual should be kept in the lift and the operator must know all aspects of that specific unit. Operators are responsible for ensuring that safety procedures are followed in operating the lift. A daily test of lift controls must be carried out. Set brakes and position outriggers (if they are used) on a stable surface or on pads. When working on a slope, use wheel chocks.

Never move an aerial lift truck with an elevated boom whilst personnel are in the basket. Articulating boom and extensible boom platforms utilized as personnel carriers must have accessible, plainly marked, upper controls. Except for in emergency conditions, lower controls should not be used to override upper controls unless permission has been given by the person within the lift.

Do not wear tree or pole climbers shall whilst working from an aerial lift.

The insulated portion of the aerial lift must not be altered.

Ensure that the booms are thoroughly inspected, that the machinery is properly cradled and the outriggers are in the stowed position before moving.

Make sure that lifts being utilized near or in power lines are di-electrically tested and conform to local rules.
